Organic sales growth highlights

Organic sales growth by region

- > **Americas +7.0%:** good results in the **US (+3.7%)** thanks to **strong contribution from Global Priorities; continued double digit growth in Argentina and Mexico; positive growth in Jamaica** after weak performance in H1 impacted by non-core sugar business; positive performance in **Brazil** thanks to a solid Q4, ahead of excise duty increase; sustained growth in **Canada**, accelerating after the route-to-market change
- > **Southern Europe, Middle East & Africa +1.9%:** **Italy stable (-0.2%)** and outperforming local market, thanks to the continued positive trend of Aperol and Campari; **Spain** and **France** showed very good growth
- > **North, Central & Eastern Europe -3.7%:** **performance entirely driven by Russia (-41.4%)**, affected by macroeconomic instability and Group's own credit control procedures, to a large extent compensated by **positive results in Germany (+3.2%)** and **UK**
- > **Asia Pacific +6.4%:** positive results in **Australia (+6.8%), New Zealand** and **Japan**

Organic sales growth by key brands

- > **Global Priorities +8.2%.** Growth across all brands: the **Jamaican rums +15.8%, Aperol +11.8%, Wild Turkey +8.8%, Campari +6.1%** and **SKYY +2.9%**
- > **Regional Priorities -7.9% (+2.8% excluding Russia).** Double digit growth in **Espolòn** and **Frangelico** and positive growth in all other regional priorities **more than offset by weakness in sparkling wines portfolio and vermouths due to Russia**
- > **Local Priorities +2.4%.** Good performance in almost all brands, particularly Wild Turkey ready-to-drink, Dreher and Ouzo 12

Results for Full Year 2015

Operating & financial highlights

EBITDA pre one-off's

- > **EBITDA pre one-off's of € 380.1 million** in FY 2015
- > **Reported growth of +12.6%**, showing a margin accretion of **+130bps** overall
- > **Organic growth of +6.8%**, showing a margin accretion of **+80 bps** on an organic basis

Net Debt

- > **Net debt at € 825.8 million**, as of 31 December 2015 (vs. € 978.5 million as of 31 December 2014), **after dividend payment** and the **repurchasing of own shares for stock options**. The healthy cash flow generation (Free cash flow of € 200.0 million in FY 2015 vs. € 177.9 million in FY 2014), which accelerated in Q4, was just in part mitigated by the negative impact on net debt as of year end due to the unfavourable FX impact driven by the US Dollar
- > **Net debt to EBITDA ratio at 2.2 times** as of 31 December 2015, down from 2.9 times as of 31 December 2014

Dividend

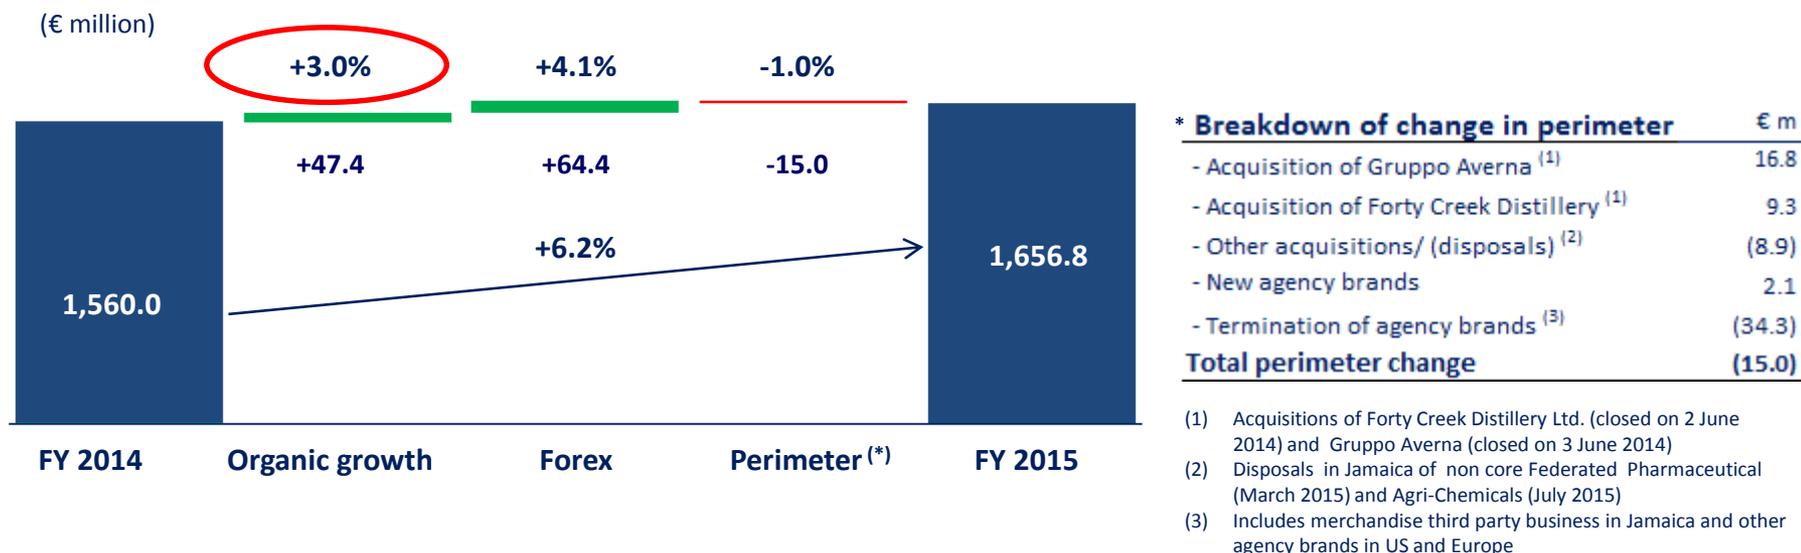

- > **Proposed dividend for 2015 of € 0.09 per share**, increasing by **+12.5%** compared to the previous year

Growth drivers

- > **Organic change of +3.0%** (or € 47.4 million), driven by **strong organic growth of high margin Global Priorities (+8.2%)**. Poor performance of low margin businesses: in particular, **weak Russia** and **the non-core Jamaican sugar business** negatively impacted the Group organic performance by -1.9% and -0.4% respectively
- > **Forex effect of +4.1%** (or € 64.4 million) thanks to **strong appreciation of USD (+19.8%)** and **JMD (+13.5%)** in FY 2015 as well as **favourable trends in all other key Group currencies** apart from Russian Rouble and Brazilian Real (devaluated by -25.0% and -15.4% respectively in FY 2015)
- > **Perimeter impact of -1.0%** (or € -15.0 million) was the combined effect of acquisitions ⁽¹⁾ and both the termination of some distribution agreements and the sale of non-core businesses

 - **Good organic performance of +3.7% (+3.3% in Q4)**
 - **Global Priorities (+5.5%)** driven by **Wild Turkey** (+7.6%, mainly driven by core bourbon +11.8%), continued double digit growth in aperitifs (**Campari** and **Aperol**) and the **Jamaican rums** (+19.4%, Appleton Estate and Wray&Nephew Overproof, on the back of the re-launch at the beginning of the year). **SKYY** grew by +0.4%.
 - **Regional Priorities (strong organic growth of +9.5% in FY)** mainly driven by **Espolòn** (+26.0%) but also **Frangelico** and **Carolans**
- > **Jamaica** (5.9% of Group net sales, or 13.9% of the region)
 - **Organic growth of +2.4%**, thanks to **core premium brands** and **Campari**, benefitting from increased focus on core business. The performance was negatively impacted by the negative effect of sugar business (organic growth adjusted for sugar business +7.9% in FY 2015)
- > **Brazil** (4.2% of Group net sales, or 9.8% of the region)
 - **Organic growth of +1.4%**, thanks to accelerated sales in Q4 ahead of excise duty increase, notwithstanding the macroeconomic weakness, which impacted the local admix whiskies as well as Campari. - > **Italy** (25.1% of Group net sales, or 79.2% of the region)
 - **Stable performance in full year (-0.2%)**, in a declining market, following a positive performance in Q4. Very satisfactory results across the aperitif portfolio: continued solid performance of **Aperol (+4.8%)**, confirmed by very positive sell-out trend, and **Campari (+2.9%)**. Local high margin brands **Crodino was up +0.2% and Campari Soda was flattish**, despite the challenging base (+15.0% and +5.6% respectively in FY 2014). Lastly, the **carbonated drinks were positive** thanks to positive weather conditions
- > **Other countries** (6.6% of Group net sales, or 20.8% of the region)
 - **Confirmed very positive trend (+11.2% organic)**, driven by **strong growth particularly in Spain** (driven by Campari, Aperol, Frangelico, Cinzano vermouth, GlenGrant and Bulldog), **France** (driven by Aperol, GlenGrant, Cynar and Riccadonna) and **South Africa** (driven by SKYY), partially mitigated by **temporary slowdown of Global Travel Retail** and **weakness in Nigeria** (Campari)

- > **Existing business ⁽²⁾:** Net sales and EBIT increased by +7.0% and +14.6% respectively. EBIT margin improved by +120 bps (from 16.5% to 17.7% on net sales):
 - **Gross profit increased in value by +9.0%** and was accretive by +90 bps as % of Net sales (from 49.7% to 50.6%), driven by the positive sales mix by brand and market, particularly skewed into H2, partially offset by the negative impact from the sugar business in Jamaica in H1
 - **A&P increased in value by +5.0%** and was accretive on EBIT margin by +30 bps (from 17.3% to 16.9% of net sales), due to phasing of marketing initiatives
 - **SG&A increased in value by +7.6%** driven by the tail end effect of the new distribution initiative in Canada, and therefore was dilutive on EBIT margin by -10 bps (from 15.9% to 16.0%)
- > **FX:** Net sales and EBIT increased by +11.0% and +20.8% respectively
- > **Perimeter:** Net sales and EBIT changed by -3.8% and -2.1% respectively driven by the combined effects of the Forty Creek acquisition ⁽³⁾, the termination of some distribution agreements and the sale of non-core businesses in Jamaica

 - **Gross profit increased in value by +3.4%** and increased by **+80 bps** as % of net sales (from 57.7% to 58.5%), driven by **positive sales mix** by brand (particularly the aperitifs) and region (particularly Western Europe)
 - **A&P increased in value by +4.1%** and was **dilutive on EBIT margin by -40 bps** (from 17.7% to 18.1% of net sales), due to strengthened A&P investments

- > **FX: Net sales and EBIT increased by +0.3% and +0.3% respectively**

EBIT ⁽¹⁾ by region: North, Central & Eastern Europe

> **Existing business⁽²⁾: Net sales and EBIT decreased by -3.7% and -4.4% respectively, EBIT margin declined by -20 bps (from 25.7% to 25.5%), almost entirely recovering the H1 dilution of -290 bps. Excluding the negative effect of Russia, the organic growth in Net sales and EBIT would have been +5.1% and +2.2% respectively. Key drivers:**

- **Gross profit decreased in value by -1.2% and was accretive by +140 bps** as % of net sales (from 54.6% to 56.0%), thanks to **sales mix improvement** and helped by the decline of the low margin Russian business
- **A&P increased in value by +1.1% and was dilutive on EBIT margin by -70 bps** (from 13.9% to 14.6% of net sales), due to higher A&P spend in the UK market and level of net sales
- **SG&A increased in value by +2.2% and was dilutive on EBIT margin by -90 bps** (from 15.0% to 15.9%), due to the tail end effect of distribution setup in the UK

> **FX: Net sales and EBIT changed by -1.7% and -2.0% respectively**

 - A&P increased in value by +3.4% but was accretive on EBIT margin by +50 bps (from 17.8% to 17.3% of net sales)
 - SG&A increased in value by +4.3% but was accretive on EBIT margin by +40 bps (from 18.7% to 18.4%)
